This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

THE

CHEMIST'S PRICE BOOK,

OR

RETAIL COUNTER COMPANION,

BY

JOSEPH GODDARD,

(MEMBER OF THE PHARMACEUTICAL SOCIETY OF GREAT BRITAIN.)

SEVENTH EDITION,

ENLARGED AND REVISED ACCORDING TO THE BRITISH PHARMACOPŒIA,

1864.

LONDON:

SOLD BY MESSRS. BARCLAY & SONS, 95, FARRINGDON STREET,

AND THE LEADING PATENT MEDICINE HOUSES;

Or may be obtained from the Editor, Post Free, on receipt of Five Shillings in Stamps.

1864.

ENTERED AT STATIONERS' HALL.

H. SILVERLOCK, PRINTER,
WARDROBE TERRACE, DOCTORS' COMMONS, LONDON.

PREFACE

TO THE

SEVENTH EDITION.

In issuing the accompanying Edition of the "CHEMIST'S PRICE BOOK," the Editor deems it right to mention that he quite purposed to have published it some eighteen months ago, about which time the previous Edition had become exhausted, but the daily expected appearance of the British Pharmacopœia led him to defer going to press until after the publication of that important work, in order that he might have the opportunity of introducing all the new preparations and make such alterations as became necessary, so as to render this Edition as complete as possible.

The work has altogether been thoroughly revised, its size increased, the quality of the paper improved, and several alterations made in its arrangement, which it is believed will render it still more acceptable to the Trade at large.

There is one feature peculiar to this work, viz., the provision made for forming an Index or Inventory to the contents of the Shop and Warehouse: the value of which, when properly carried out, it is difficult to over-estimate. The Editor has received thanks from many members of the trade who have made use of this system, and he feels great confidence in urging it upon the attention of the Trade generally

as well worthy of their adoption. A glance at the "Directions" on the adjoining page will show the simple nature of the plan—so much so, that it may be safely left in the hands of an intelligent apprentice to carry out, and when once accomplished will serve for an indefinite period.

The advantages attendant on such an arrangement will be especially felt on the introduction of a *fresh assistant*, who, by its means, will be enabled at once to find any article he may require, as well as to ascertain at a glance whether such article is kept in stock *or not;* indeed, at all times it will tend much to facilitate business, and prevent the liability to mistakes, frequently arising from the neglect of that golden rule, "A place for everything, and everything in its place."

16, GALLOWTREE GATE, LEICESTER.

April, 1864.

DIRECTIONS

FOR FORMING THE

INDEX TO THE SHOP, WAREHOUSE, &c.

The Bottles, &c., having been carefully arranged, the shop should be divided into a certain number of compartments, each to be represented by a letter of the alphabet, thus—a certain number of drawers behind the counter may be called A; a similar number adjoining these be called B; the shelves above the drawers A, may be known by the letter C, and those next these, above the drawers B, be called D; and so on till every distinct part of the shop has a particular letter assigned to it. The part represented by each letter to be carefully described in the index appropriated at the beginning of the book for that purpose. To illustrate this matter still further, suppose the drawers A to be six rows deep, the top row would be distinguished as A 1, the second row as A 2. Any article therefore kept in the top row would have the characters A 1 placed opposite its name in the Price Book: if belonging to the bottom row it would be designated A 6. The shelves C would be known in a similar way—supposing them four in number, the top would be known as C 1, the next below as C 2; and every article kept on these shelves, whether in front or behind, should have the characters C 1 or C 2 placed against their names in the list. It will be easily seen that in this manner every part of the shop may be distinctly specified.

It has been suggested to the Editor, that in many instances this method might be applied with great advantage to the Stock in the Warehouse, &c.; he has, therefore, introduced into the present edition an additional column for this purpose.

In adopting this plan it is simply necessary to give a number to each room (or portion of a room), and place that number in the Stock column against the name of all articles contained in such situation.

The Editor begs further to add one or two suggestions as to the best way of inserting the "Cost Price;" for this purpose a *private mark* should be used, and as it is frequently of much importance to distinguish the prices of various houses, it is recommended that the name of each firm with whom business is transacted be inserted opposite one of the numbers in the page appropriated to this purpose at the beginning of the book; which number placed *above* the mark will at once show to whom such price refers. In order to ascertain the date of a quotation, it will be well to adopt a different mode of marking each year, thus—for the first year the mark should be written $^{P}/_{N}$, the second thus $\frac{P}{N}$, the third thus $^{P}/_{N}$, and the fourth thus $\frac{P}{N}$; after which, if necessary, the characters may be recommenced.

N.B.—Articles commonly used for Veterinary purposes will be found under their English names;—the same remark will apply also to Lozenges.

USEFUL HINTS FOR CALCULATING

OUNCES, POUNDS, HUNDRED-WEIGHTS, & TONS.

The following are the principles on which may be readily ascertained the relative prices of the ounce, pound, hundred-weight, and ton.

The price per ounce being known, to arrive at the price per pound, add *one-third* to the *pence* price per ounce, and the result is the price per pound in *shillings;* the rule being to equalize the pence per ounce with the number of ounces in the pound, viz. 16.

To find the price per cwt. and ton, multiply the price per pound in *pence* by $9\frac{1}{3}$, that being the proportion of shillings per cwt. to pence per pound; the product is the price per cwt. in *shillings*, and per ton in *pounds* sterling.

Thus, the price per ounce being 1*d.*, call it one *shilling*, and add a third (viz. 4*d.*), which gives 1*s.* 4*d.* as the price per pound. Then for the hundred-weight and ton, take the price per lb. in *pence*, viz. 16*d.*, and multiply by $9\frac{1}{3}$, which makes $149\frac{1}{3}$, being in *shillings* for the cwt. 149*s.* 4*d.*, and in *pounds* for the ton £149 6*s.* 8*d.*

Again, suppose the price is 3*d.* per ounce. Add one-third, and call it *shillings;* it is thus 4*s.* per lb. Convert this into *pence*, viz. 48*d.*, and multiply by $9\frac{1}{3}$; we have then 448 *shillings* for the cwt., and 448 *pounds* for the ton.

Why the shillings are called pounds is simply because 20 cwt. make a ton, and 20*s.* make a pound sterling.

The reverse operation is similar, except from pounds to ounces. To arrive at the ounce price at so much per pound, call the pound price in *shillings* "*pence*," and deduct *one-fourth*. Thus, say at 4*s.* per pound, call it 4*d.*, and deduct *one-fourth*, which leaves 3*d.* per ounce. Again, at 2*s.* per pound, call the two *shillings* two *pence*, and deducting one-fourth leaves $1\frac{1}{2}$*d.* per ounce.

NOTE.—To arrive at the price per pound from so much per ounce, ADD *one-third* to the *pence* price per ounce, and call the result *shillings*.

To arrive at the price per ounce from so much per pound, call your shillings *pence*, and DEDUCT *one-fourth*.

THE FOLLOWING CALCULATIONS,

SHEWING THE PROPORTIONATE PRICE BETWEEN THE

OUNCE, POUND, AND HUNDREDWEIGHT,

WILL BE FOUND USEFUL FOR REFERENCE.
